JULY 2021 NEWSLETTER

August Holiday

Monday August 2nd The clinics will observe the August Civic Holiday. Clinics will be open only in the morning. There will be no delivery service. Vet will be on call for emergencies. **Just a reminder** if you are not sure if your drug residue test for milk will be a three hour test or a fast test, just give us a call!

New BRD Vaccine from Merck Animal Health: Bovilis® Nasalgen® 3-PMH

Talk to your veterinarian about this new viral and bacterial BRD vaccine now available in 1 dose, 10 dose, and 50 dose formats.

One dose helps provide broad respiratory protection against 5 of the most common viral and bacterial causes of BRD. **No booster required.**

Duration of Immunity				
IBR	BRSV	PI3	<i>M. haemolytica</i>	<i>P. multocida</i>
≥195 days	≥78 days	≥95 days	≥122 days	≥125 days

Early Vaccination: Use in healthy cattle, one week of age and older.

Easy Intranasal Administration – Perfect for use in young calves because of added mucosal response.

Non-temperature sensitive IBR fraction: Administration during periods of high ambient temperatures had minimal effect on efficacy.

Safe for use in pregnant cows and in calves nursing pregnant cows.

BluShadow™ diluent helps clearly identify vaccinated animals.

Watch the following during heat stress

Meeting the nutrient requirements of dairy cattle during heat stress can be a chore.

These points are important to keep in mind during heat stress:

1. Maintain rumen health, especially when trying to cram extra energy into the diet.
2. Minimize pregnancy loss. The effects of heat stress are not just in a two- or three-month window during the summertime. Think about how heat stress affects reproductive performance nine months down the road.
3. Keep cows as comfortable as possible. The importance of cow comfort and heat reduction can't be stressed enough.
4. Minimize dry matter intake loss. Keep intakes consistent with good bunk management.
5. Minimize body condition score loss. Feeding fat is a strategy that can help with this.
6. Minimize sorting. Sorting becomes a bigger issue during heat stress.
7. Don't crowd close-up and fresh cows. Watch competition issues related to bunk space.
8. Rethink the size of your transition/calving facilities to accommodate changes in calving behaviour that results from heat stress.

ZOETIS ORBESEAL REBATE for Purchases July 1 to Aug 31 2021

If you would like the clinic to submit on your behalf, at the end of the program, please let us know and we will look after it for you!
