## **NOVEMBER 2017 NEWSLETTER**

### **Clinic News**

ORDERING: Now is a good time to think about what you should have on hand over the December holidays and winter bad weather days. As winter approaches, we remind you to keep your lanes clear for Gerry and Bruce to deliver, and your vets and RVTs to access your barns.

There will be no delivery for four days, with the clinics closed December 25 & 26, and also January 1. Special or large orders please place in early December. Some of our vendors have year end shut downs and limited deliveries to work around.

2018 Zoetis calendar books have arrived and will be available at the Producer Meetings, or ask for one to be sent with an order.

## **DAIRY PRODUCER MEETINGS**

***PLEASE RSVP TO RESERVE A SEAT AND MEAL BY MON NOV 13<sup>th</sup> for MOUNT FOREST  
and FRIDAY NOVEMBER 17<sup>th</sup> for LINWOOD***

**Dr. Allison Pylypjuk** will speak on WHY we should be monitoring calf health parameters, and the impact on future productive life.

Dr. Allison Pylypjuk was raised on a dairy and beef farm in Southern Manitoba. She graduated from the Western Canadian Veterinary College in 2011 and attended Summer Dairy Institute at Cornell in 2010. She currently owns a dairy consulting practice in Manitoba which focuses on preventative medicine and along with her husband, own a 75 cow dairy. Allison is a contract veterinarian with Zoetis, providing technical support for veterinarians in Ontario.

**Dr. Shannon Walsh**, Linwood Veterinary Clinic, will present information on how the clinic can help producers monitor calf health.

## Lunch

**Brian Keunen** – Brian will speak about Milk Replacer

Brian is a graduate of the University of Guelph with a B.Sc. (Agr) and an M.Sc. He was raised on a dairy farm and has been a milk and grain-fed veal producer since 2002. He produces around 3,000 grain-fed veal each year. He is the current Chair of Veal Farmers of Ontario (VFO) and a Director with the Canadian Veal Association. He is also a member of the Veal Cattle Code of Practice Development Committee through the National Farm Animal Care Council. In 2005, Brian established Mapleview Agri Ltd. which manufactures milk replacers for livestock. Improving calf nutrition has been an integral part of his research over the last ten years, conducting many on farm studies constantly looking for the optimal feeding program to improve the health and welfare of calves while maximizing growth during the milk feeding period.

**EPRINEX® - It's Eprinex® time again for our dairy herds! Eprinex® is a zero milk withdrawal, zero meat withdrawal pour-on dewormer safe for all ages of cattle. Eprinex kills both external and internal parasites such as stomach worms, mange and lice. Killing parasites can result in up to a 1L per day per cow milk increase and makes our dairy cattle more comfortable and less restless.**

**You can apply Eprinex® yourself, or call the office to have Eprinex® applied at herd health, or have a Registered Veterinary Technician out to apply it for you.**

## *November Special! Calf Coats*

The clinic stocks a full line of washable and dryable, locally made calf blankets. It's important to keep young calves warm in the winter to prevent sickness and promote growth. We have sizes M, L, and XL to fit calves from birth to about 2 months old. Calf blankets/coats are \$30 to \$35 each but on special in November, just in time for the cold!

Easy to Wash

Sizes Medium, Large and Extra-Large

Prices and Price Breaks

Each -> \$25.00

3X -> \$23.00 each

6 or more -> \$21.00 each
